About Me

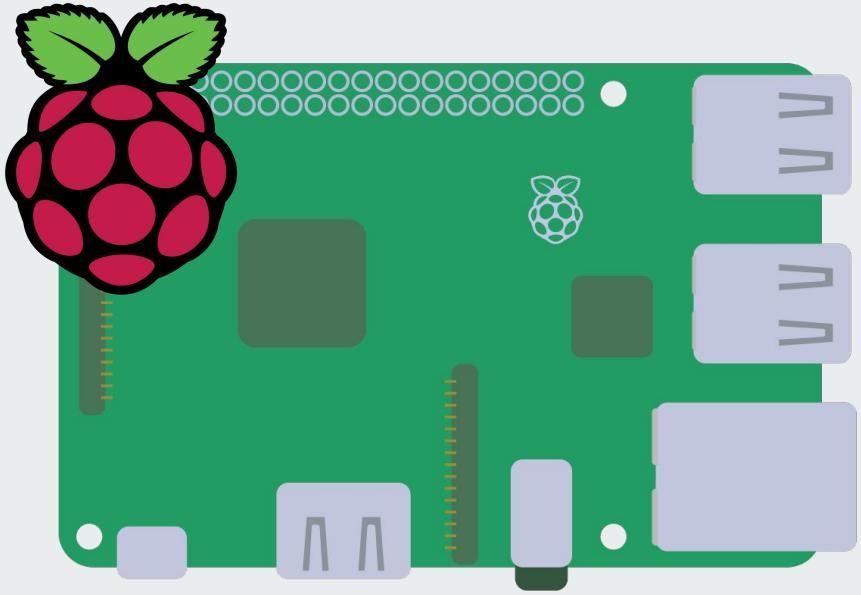
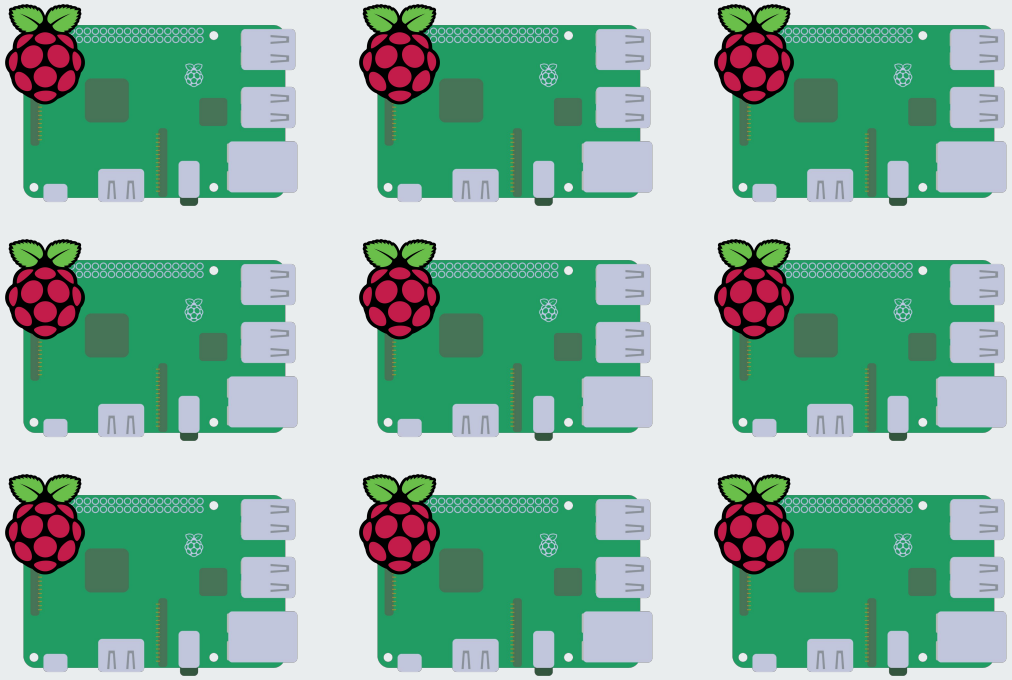
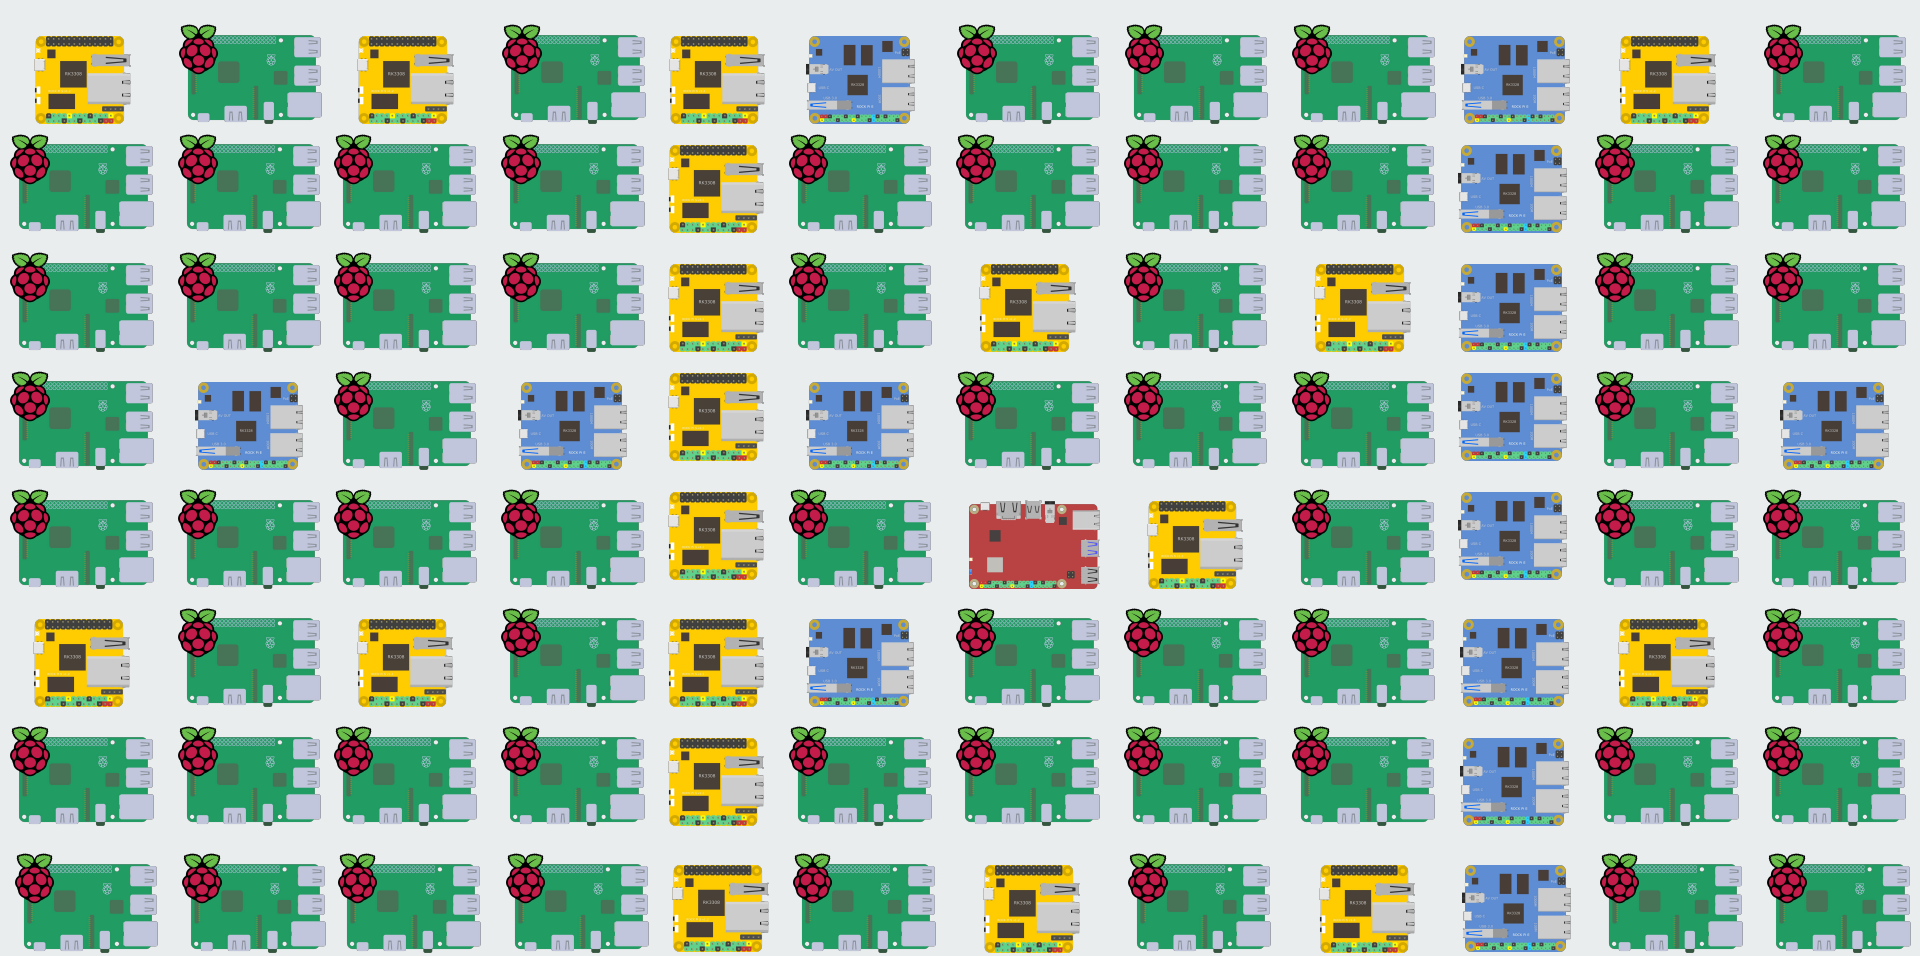
Marc Pous

IoT Giant & Developer Advocate





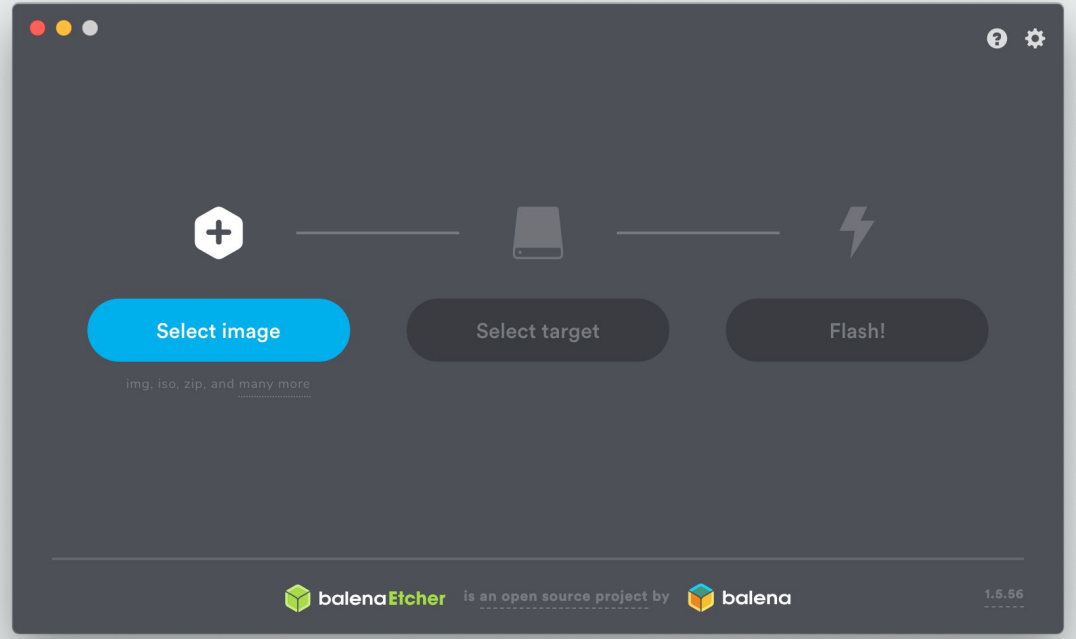


FlowFuse

The DIE HARD method
Deploy with balena

balena

Maybe you know this...



What is balena

A secure container-based technology stack that enables you to **develop**, **deploy**, **manage** and **scale** large fleets of IoT Linux devices at any stage.

What is FlowFuse

FlowFuse allows organizations to **reliably deliver** Node-RED applications in **a continuous**, **collaborative**, and **secure** manner.
