I love to build prototypes!

Hello!

Vibe coding

The end of coding?

I edit code AI write!

I don't need to code!
I can focus!

**I think for prototyping
vibecoding is good!**

Edge Impulse

Today!

Today!

A terminal window with a dark background and light green text. The window has three colored window control buttons (red, yellow, green) in the top-left corner. The prompt is 'user@MacBook ~ %'. The command 'claude --help' has been executed. The output shows 'CLAUDE CODE' in a large, orange, outlined font. Below it, a paragraph states 'Claude Code is the official CLI for Claude, built by Anthropic.' followed by a green section header 'INSTALLATION'. The text then says 'You can install Claude Code using one of the following methods:' and lists three installation methods with their respective commands. The first method is for macOS or Linux using Homebrew. The second is for macOS, Linux, or WSL using a script. The third is for Windows PowerShell using irm. The text concludes with 'After installation, run `claude` in your terminal to get started.' and the prompt 'user@MacBook ~ %' is followed by a cursor.

```
user@MacBook ~ % claude --help

CLAUDE CODE

Claude Code is the official CLI for Claude, built by Anthropic.

INSTALLATION
You can install Claude Code using one of the following methods:

# Install with Homebrew on macOS or Linux
$ brew install --cask claude-code

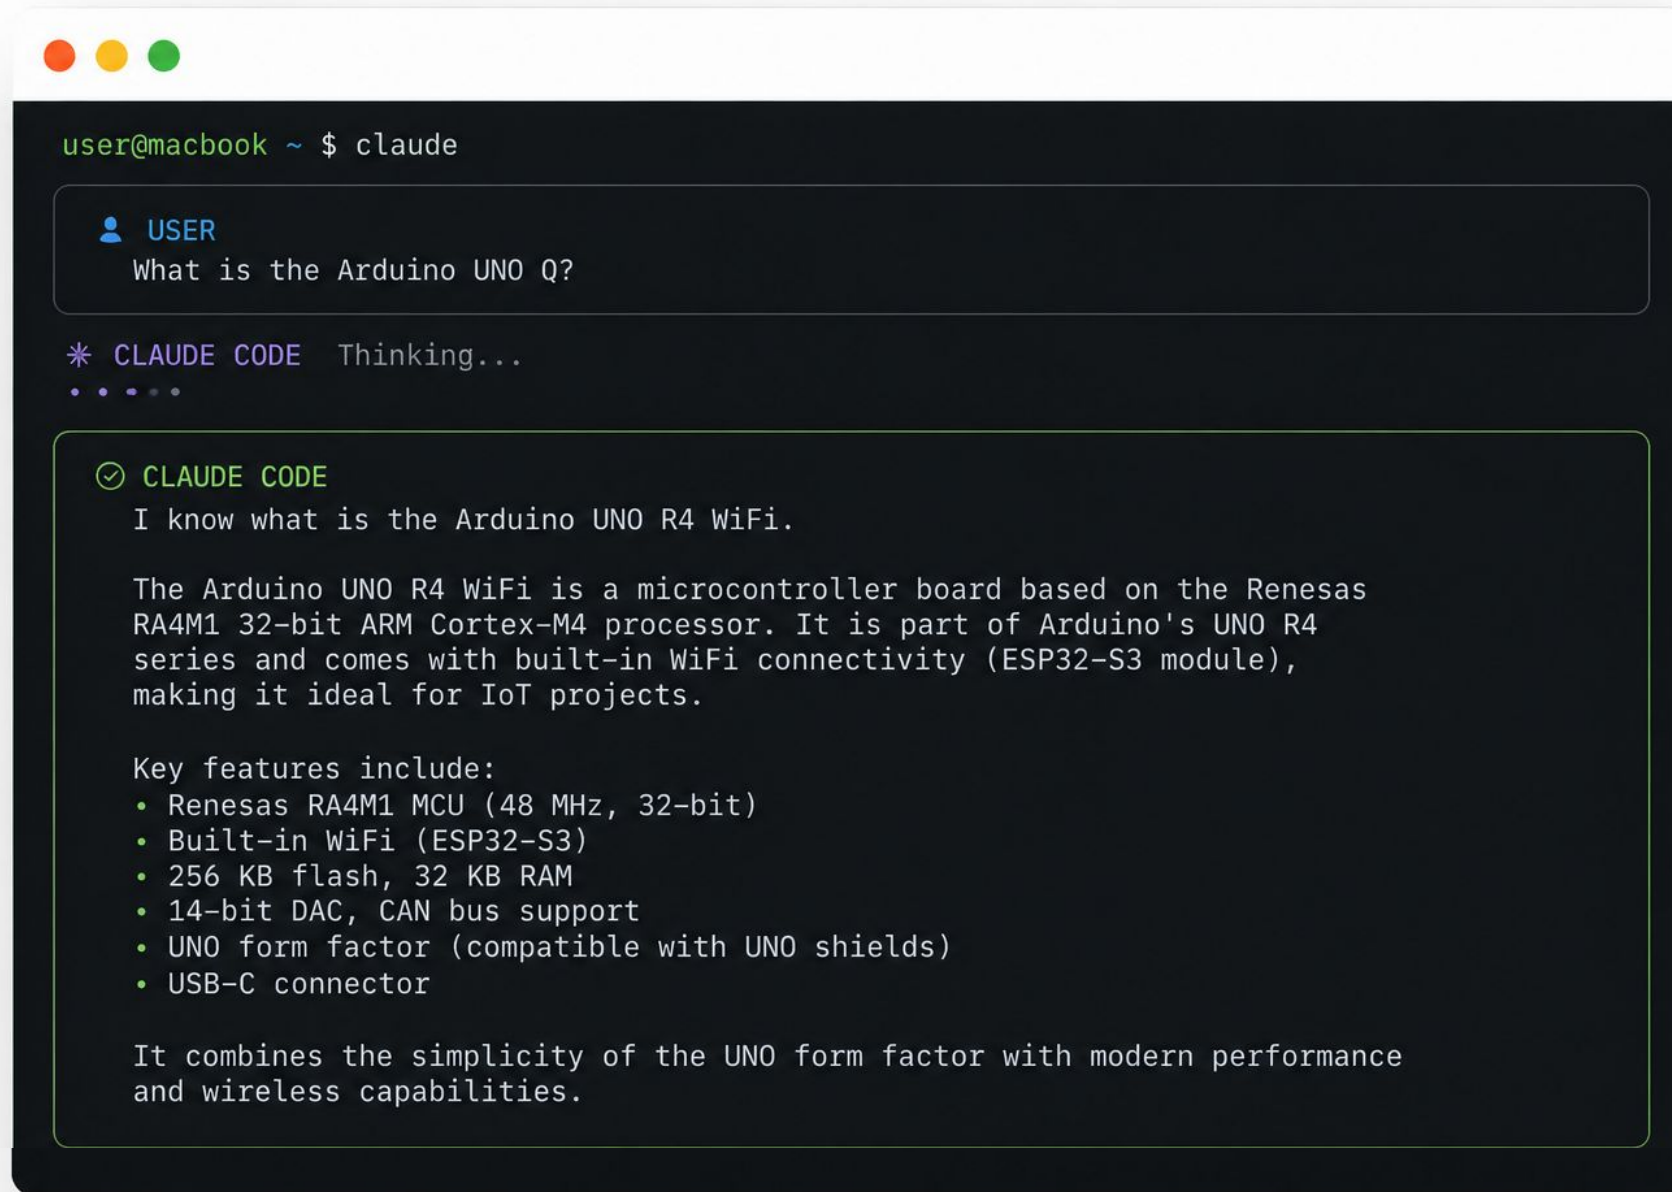

# Install via script on macOS, Linux, WSL
$ curl -fsSL https://claude.ai/install.sh | bash

# Install on Windows PowerShell
$ irm https://claude.ai/install.ps2 | iex

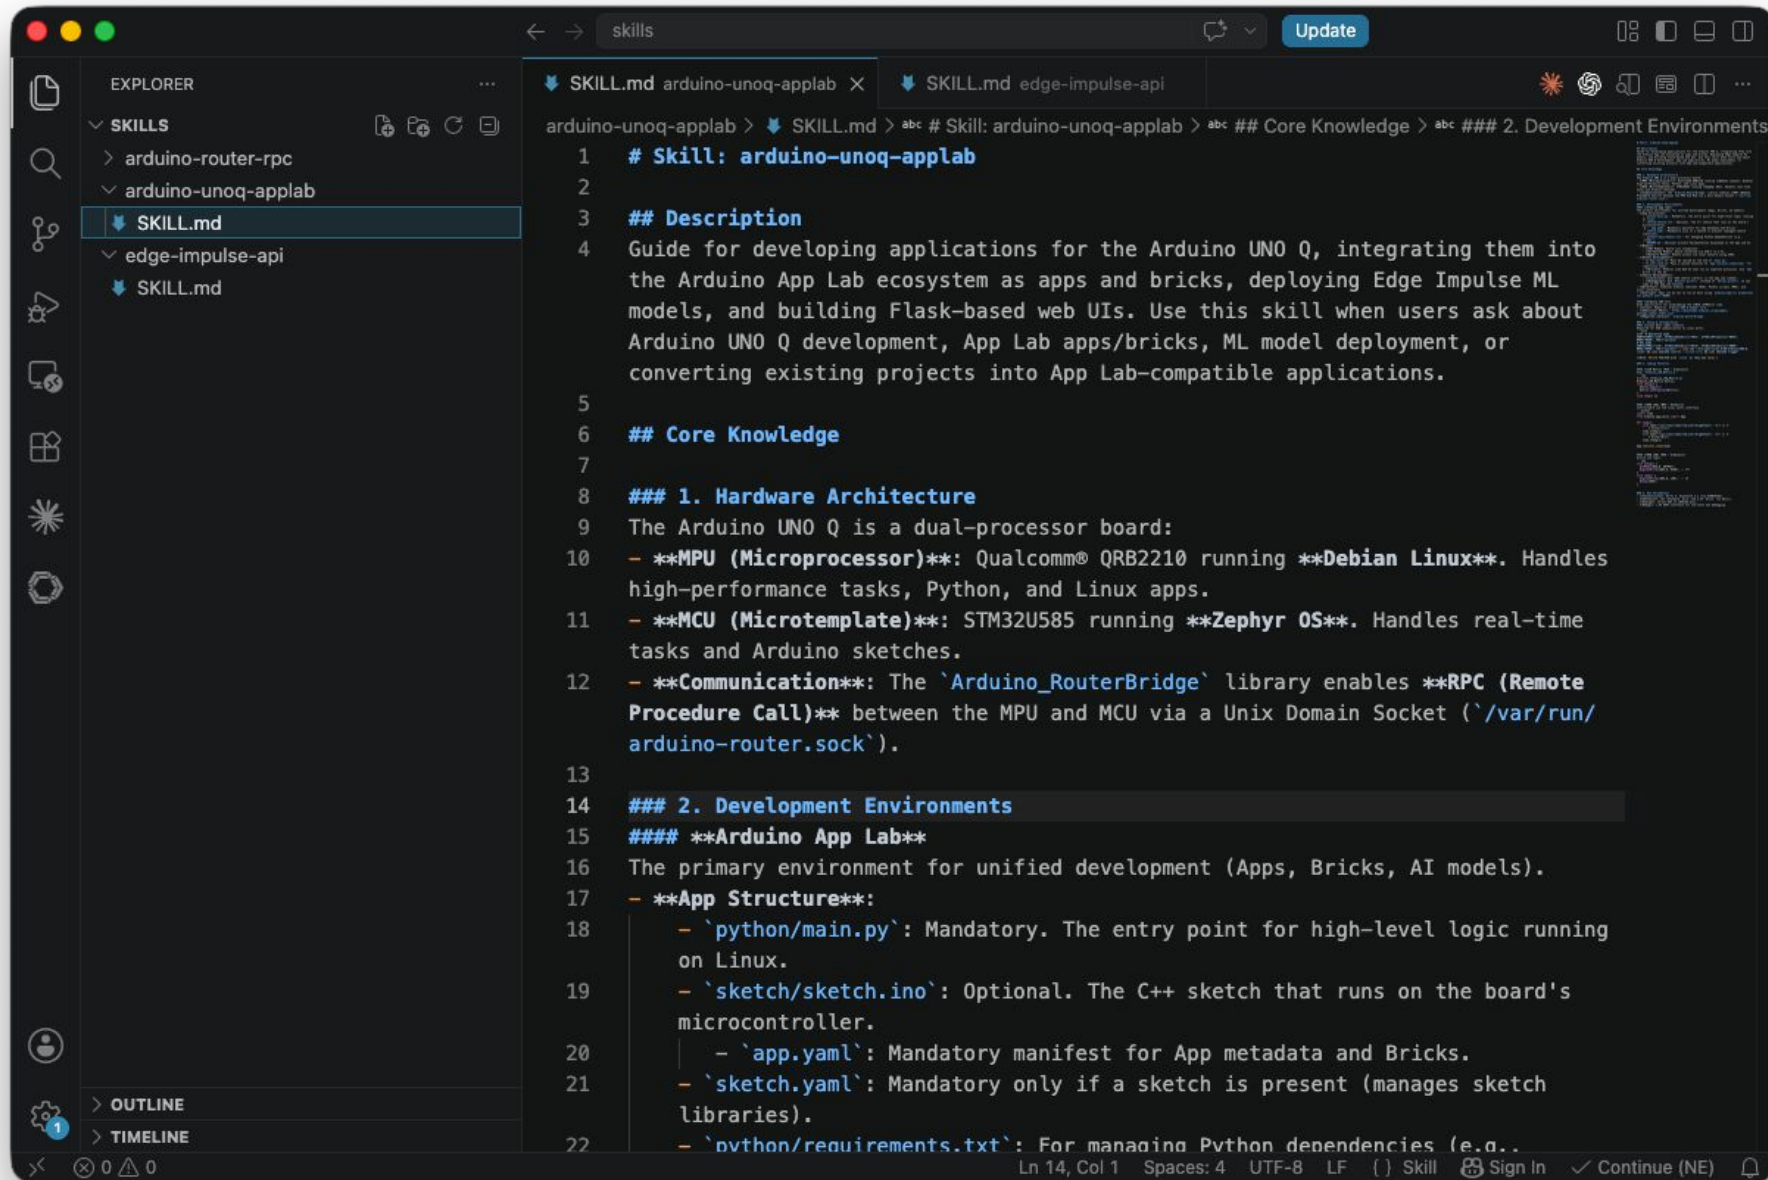

After installation, run `claude` in your terminal to get started.

user@MacBook ~ % █
```

How to install Claude Code?

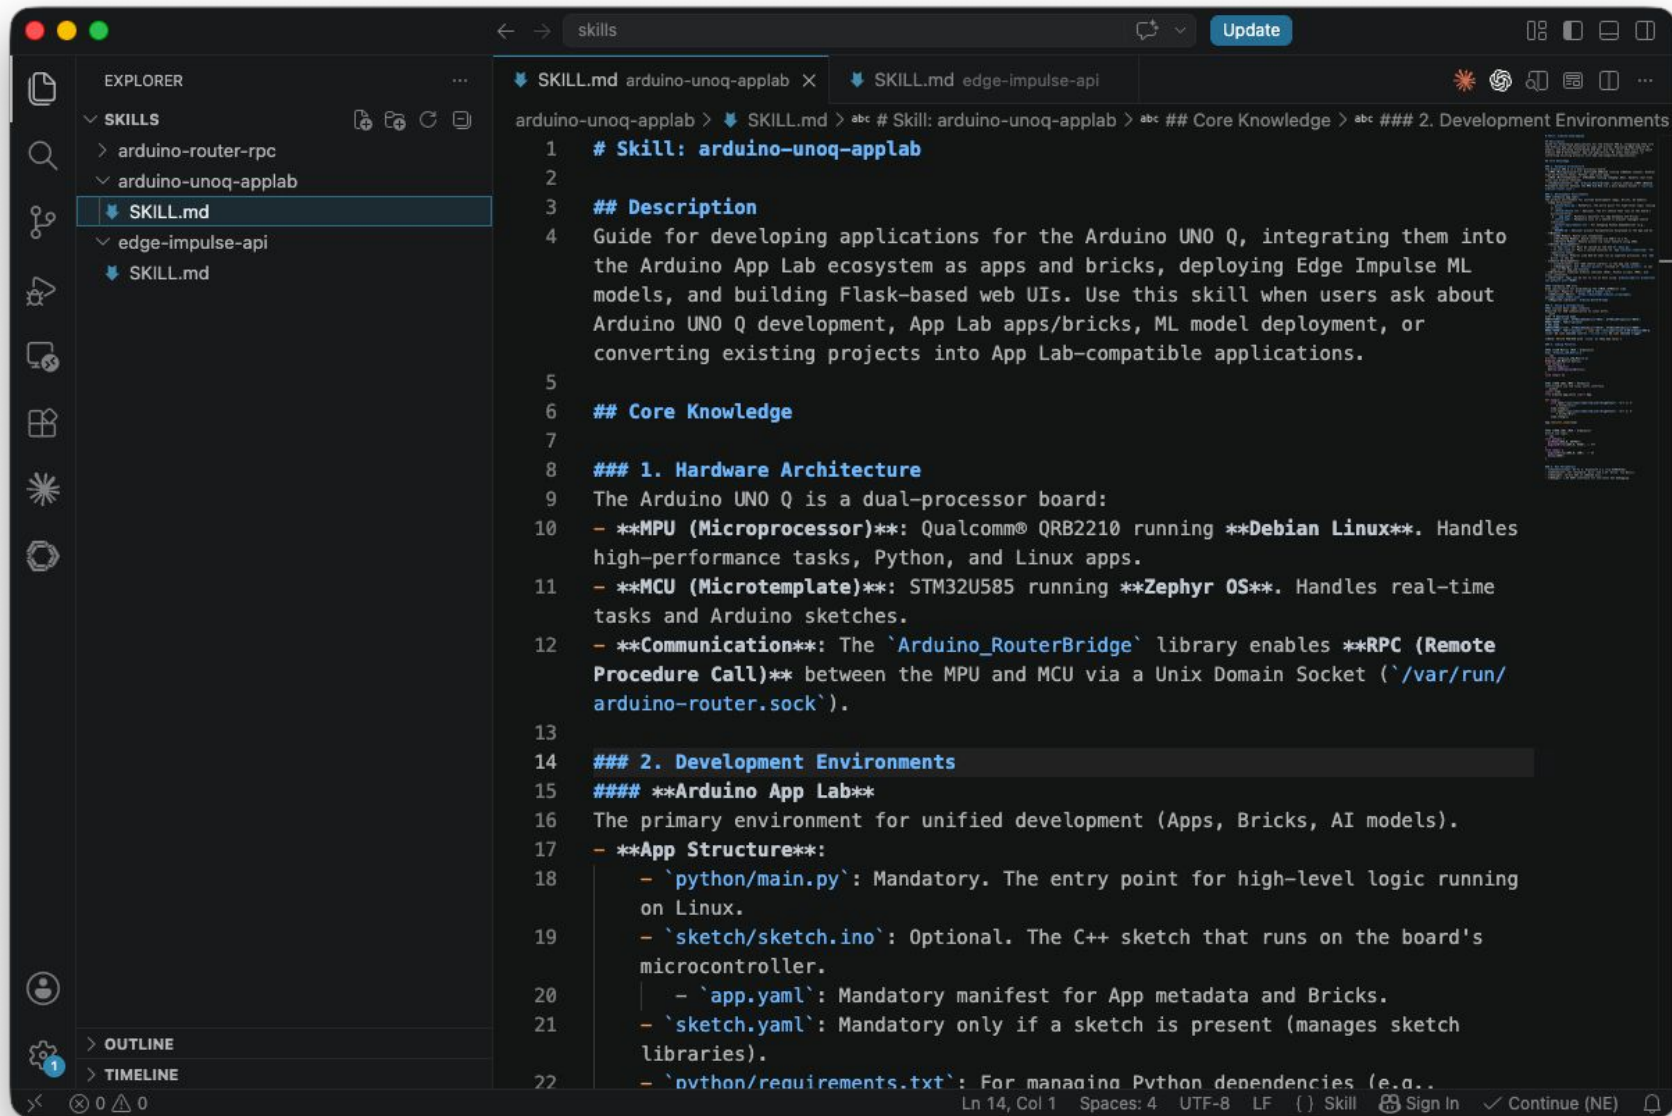

Claude what is the Arduino UNO Q?

Skills

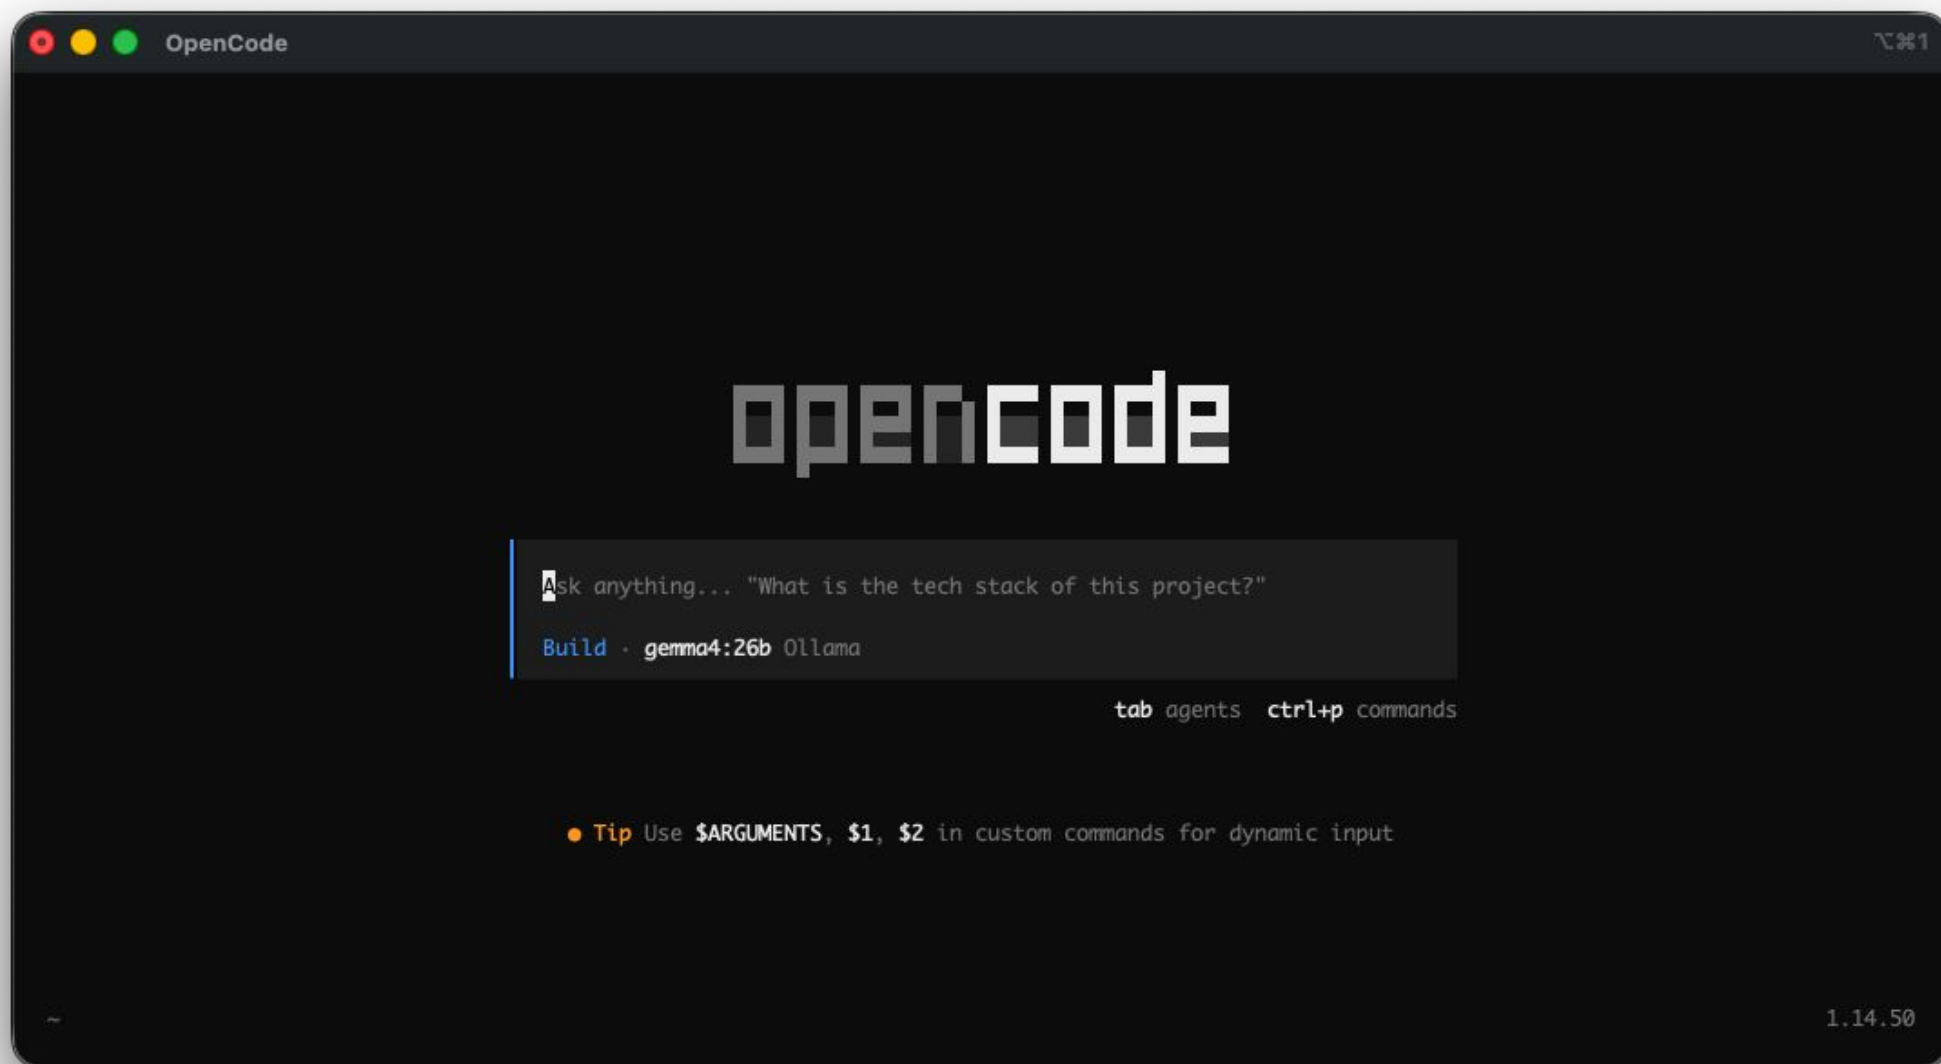

Agent	Skill folder	Status
Claude Code	<code>~/.claude/skills/</code>	✓ Native (creator)
OpenAI Codex CLI	<code>~/.codex/skills/</code>	✓ Adopted in 2 months
Gemini CLI	<code>~/.gemini/skills/</code>	✓ activate_skill tool
Qwen Code	<code>~/.qwen/skills/</code>	✓ Native support
GitHub Copilot	<code>.github/skills/</code>	✓ Via VS Code extension
Cursor	<code>.cursor/skills/</code>	✓ Native
Android CLI	<code>android skills add</code>	✓ Google published repo
.NET CLI	<code>dotnet/skills repo</code>	✓ Microsoft published repo
